

1031/S4

## set of 4 circlip pliers

The Beta 1031/S4 series spring ring pliers are made of spring steel, a material that guarantees excellent breaking strength. To give the pliers additional strength and durability, the straight jaws and tips are moulded into a single body.

## Features:

- Cataphoresis coating, a treatment that provides high protection against corrosion and chemicals
- Made of silicon spring steel
- Tips and beaks moulded in one body
- Cold-forming for increased plier toughness
- PVC-coated handles for a secure grip

650 g

Beta pliers are printed with the range of ring diameters for which they are suitable. This will make it easier to find the correct pliers and carry out efficient machining.
